Thread: [Site Optimization](#)

Saitama - October 7, 2020, 5:00 am

I have a static Ip, that needs to be cleaned like removing unused css/js files and optimizing the code to lower site loading times and to set cache for files, it has about 3main pages.

HMU if you can do this

[contract=tid]Start Contract[/contract]

Israinsolutions - October 7, 2020, 5:18 am

Hey, i can help you with that!

Add me on discord: israinsolutions#7117

still need this, bumping got a budget of \$65

Charger - November 27, 2020, 6:34 am

Add prefetch, add a CDN like clouddinary or cloudflare, and use this

<https://developers.google.com/speed/pagespeed/insights/>

I added bunnycdn after which my traffic tanked alot, now I only have certain big images on cdn, not sure how to have everything on cdn without fucking up seo

There is i think alot of junk code that needs to be removed along with adding cache to apache

nivrinaj - November 27, 2020, 1:58 pm

Message me the details. I can do this
