Thread: [Google Classroom video jam](#)

Anonymous-uuser - October 8, 2020, 5:49 am

Does anyone have a clue about how can we jam our own video during an online class on google classroom, so that the teacher will think that the student have a network problem/slow network (making the video kind of glitchy)

lol remove the internet from your PC and then they will get the interruption as you're not online
And do it for 5-10 times in regular interval
