Sorry for the slow reply but these can spoof calls to any country however spoofTEL may charge a different rate when trying to call EU compared to US for example. Still have many of these accounts available for those interested!

How would I make money with this?

Canada - December 19, 2020, 9:03 pm

(Dec 13, 2020 03:13 PM)GameAware Wrote: ([CITE](#)) How would I make money with this? Use your imagination for that part. It could also be used for investigation purposes, if you contact someone making them think it's someone else.

Nice, as far as I've seen USA SMS spoofing is very rare. I know you mentioned it works for USA but can I choose my own spoofed number for SMS spoofing? Thanks in advance..

EDIT* Nevermind I've read on the site it spoofs it to a random number instead of picking the number you want.
