Thread: [What is the best reasons to get into RATs?](#)

Shimakaze - October 15, 2020, 3:34 pm

How's it going everyone,

Back in the day I won a RAT from here, was pretty fun using it for pure giggles basically but I am coming to ask today what more can I do with it than mess with people?

I have been out of the game a long time so I'm sorry if this is a dumb question, can I make money from this? What would I need if so?

I got a couple of hundred I can put into this if this is the best kinda thing I could invest in, let me know.

Thanks for your time

If you are looking for white greyhat things to do with a Remote Administration Tool, consider XMR mining, viewbotting or selling your bots.

If you are into blackhat techniques, there are a fewwww more options.

However, the spreading and infection game has gotten much, much more difficult than it was before.

Thank you for the detailed response, was also debating ways to monetize RATS but decided that there's not much you can do that arent FULLY blackhat

All of these examples are illegal, so they are blackhat and not greyhat in my opinion (especially XMR mining).

I guess you have more options and better success chances for making money if you use botnets instead of RATs. Note that most of these methods are illegal, so you should probably stay away from it.

UnderBot - *October 17, 2020, 12:31 am*

RAT's can make ok money if they are applied correctly. There are options like HVNC/HRDP, ETH/XMR Mining, and more, definite profit though.
