I'm convinced it's the same guy or group all doing this impostor bs. It's kinda coordinated to be alone unless they have nothing else to do. They match bios, they target when the Hf user is offline, they always want it sent first, and they all find the victims on here shortly after posting.

Regardless thanks for the heads up. And for new users don't do dead over discord, bring the convo back here and double, hell triple, check that it matches up. Use MM when in doubt, always! (Honorary plug for Zexi's MM service)
