I've got a very low risk method that guarantees me to make profit. I started with \$100 in my account (about 2 weeks ago) and have almost \$2000 now. Thinking of selling this method later on when I hit \$5000.

"gambling" & "guarantees me to make profit". The house always has >50%. Unless there is a loophole somehow, which is unlikely.

Nice winnings bro but be smart to save some before going back gambling them all.
Keep on winning bro good luck

Congrats for your winning Sir :)
Obviously you're more lucky than me. Everytime I gamble my money, I lost everything ?

Like anything else there's ways to minimize risk while increasing your probability of winning.

I did that in less than 5 hours and then lost it, like about a week and a half ago. :(
