Thread: [Recommend Me The Best Bluetooth Headphones For a Reasonable Price](#)

Blockonome - October 21, 2020, 3:50 am

Hey guys,

I am currently looking for a Bluetooth Headset for everyday wear, listening to music and so forth.

NO apple earpods please, but I am open to Headphones and Earbuds, as long as they run with Bluetooth.

And asking for a reasonable price or any discount prices, as I would like to get a good deal!

Bought SkullCandy Indy Fuel Wireless Earpods for \$49.99 @ Costco. Retails for \$79.99

Xiaomi Redmi Airdots, around \$17-20. Superb quality for the price.

Tranya t10s are by far the best budget wireless earbuds I have ever used and I went through dozens of pairs with many issues before settling on these as my go to for earbuds

Edit: i would recommend these over any option from raycon, skull candy, or any sort of like store brand or anything. Not only do these things pump noise, usbc charging, lasts drops from 8 foot ladders at my job, and has bass boost and great audio quality, better than my car radio and other basic stuff I've bought. I originally learned about them from the dankpods youtube earbud reviewer after watching his raycon roasting video.

I would suggest some cheap ones but since im rocking the sony wf-1000xm4, i advise you to get them. Get some amazon gift cards for 70-75% and u are getting a pretty good deal already. They are just amazing, that's all i'll say.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Yea I second this. I'm currently using Apple Airpods Pro but I used Airdots for the past 2 years with

no issues.

The sound quality is pretty dang good for the price (\$35 USD where I live) and yea, they're pretty decent overall.

Yeah, for \$35 I abused the living hell out of them with constant showering with the airdots on. Around 2 years as well, but as of lately the microphone stopped working properly and I copped myself the Apple AirPods 2nd Gen which perform much better, but unfortunately cost a lot more at \$215.

I'm using Audio Technica ATH-M50X and they're cool

If you have like 200\$ to spend go and get the bose quietcomfort 2, they are amazing.
