Thread: [MY BEST BUSTABIT WIN](#)

5-MEO-DMT - October 21, 2020, 5:00 am

So today i decided i'd put \$25 AUD worth of bitcoin into bustabit and see what i could get it up to, here are the results.

(started with 1,200 bits)

<https://imgur.com/a/ZOMAsN7>

let me know about your best wins! also no strategy used, no ebook or "private script" just using the old knoggin' ?

ETH - October 21, 2020, 5:52 am

wow \$25 to nearly 2k USD congrats bro !

Prawnster - October 21, 2020, 5:54 am

lmao nice win op, means you get a few days to relax and enjoy your cash ay ;)

Or you could invest it into something else and use ur money to snowball urself into a great future haha

Ha, rookie numbers

I put 25 and would end up with -100 cause I would think I might be luckier next time and have to minimize my loss ?

Congrats OP be smart with it and don't yeet all at once

Or put in 25 win 10k then play till I legit had negative numbers, that so sounds like me ??

Oh god, I thought I'm an unlucky person
Sorry for your loss ?

Cooligan - October 21, 2020, 11:37 am

Congrats on your big win [5-MEO-DMT](#)

Curiosity question though;
For someone who doesn't play Bustabit, how do you calculate the value of a certain amount of bits?

For instance in the screenshot it said 106k bits is worth about \$1,300 USD - how does one come up with that?

Is it by every x amount of bits or does the value fluctuate at all?

znc - October 21, 2020, 11:49 am

A bit is a portion of a bitcoin.

106,000 bits is 0.106 BTC if I'm not mistaken.

So in a sense that's a good way of figuring it out?

Say I won 500,000 bits, that would mean I won around \$6.4k (0.5 BTC) ?

Correct. It's not a "good way" of figuring it out, it's actually how it works.

You deposit .1 btc, you get 100k bits to bet with. You withdraw 500k bits, you get .5 BTC.

UsernameByte - October 21, 2020, 11:59 am

I had about the same but lost it...

Awesome, always wondered how everyone was figuring it out lmao.

Felt like a complete noob.

Then again I'm not really a fan of Bustabit, I've used it a few times but just can't get attached to the whole crash aspect.

I am waiting for BustaByte to come out though, that should be a lot of fun seeing it's with Bytes.

Is the bustabyte idea confirmed? That'd be dope as hell.

The idea is confirmed yes, however when it'll be available to play is not.

It's still in development.

Blockonome - October 22, 2020, 4:00 pm

Congrats on your earnings OP, do not spend it all at once ;)

Hey, to answer that question. Shiba is a helper bot in the chat, if you @shiba then type it in the chat you can bring her user handle up, add her as a friend and you can use the !c command, for instance to calculate what 106k bits was worth i messaged shiba !c bits 106k usd, and i think the bits fluctuate.

1 bit is 0.000001 BTC.

100k bits = 0.1 BTC
1 Million bits = 1 BTC

K1. - October 25, 2020, 2:13 pm
Nice work homie!

I managed to turn \$50 into 1 BTC on one of my first times playing. I noticed the chatroom telling me to stop playing and leave, so once I realised a million bits was 1 BTC I just withdrew and invested in alt coins

Never been back, wish you all luck!

ADA - November 5, 2020, 2:30 am
Congratulations mate. Try not to get addicted cus then your life goes to shit

5-MEO-DMT - November 5, 2020, 9:22 pm
Edit; played my amount upto 180k bits and cashed out for a total of 3.4k AUD.

Can you tell me more about this idea? I didnt know that "bustabyte"

Bullup - November 8, 2020, 11:25 am
Wow thats really amazing. Good luck with spending the money to something beautifull.
