Here is my review:

I was get vouch discount as first customer, thanks for that :)

So since start to finish I can't say nothing bad about OP, he was explain me everything step by step and was make all custom works which I was request (changes in design, logo for my store, custom pages (ToS, Privacy Policy...), plugins etc.), so he have clue what he do and he is good in that.

At the end store look how I want it to look, and anyway he said if there will be small changes which I want to make that he will be there to help me with that.

Also he help me to decide which product should I sell, but I mean it's up to you, you have to find your winning product but sometimes small advice can help.

Process was take about 5 days, could be faster but because of my job I was unable to be always online, but yeah fast enough :)

He gave me also access to huge amount of ebooks and videos from all famous "dropshippers", so if you are beginner that will help you a lot, you have literally all in one place.

So long story short, if you are looking to jump into shopify business and you need your custom store go ahead with him he have my vouch.

Price is more than fair, some guys here are just looking for ebooks about dropshipping 100+\$ and here you get everything.

GLWS and thanks again ;)

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
