'Just PM Me' That's it?

How about you explain what exactly it is rather than saying everyone to send you a PM.
What's the point of the thread, if you just gonna say PM Me in the end.

Explain your method shortly sir.

You don't have to leave any reliable informations.

I'm going to wait until I see some vouches done, I'm having my doubts. I don't think anyone is running Android 5 or older. Therefore your link method wouldn't work and you'd have to somehow get them to download and install an APK.
