Thread: [\[BTC\] Bug-Bounty | Written in PHP](#)

somec - October 23, 2020, 7:37 pm

I run a few websites, and they all consist of mostly the same functionality and code.

What I'm mainly looking for:

Recently the main IP address of the server has been getting leaked (even though it's behind cloudflare) and I'm looking to see if anyone can get it.

I'm also open to other bugs.

I'm paying typically around \$20-\$50 given the bug. Create a convo for the website.

proof first that you are the real site owner

Ramb0x - October 24, 2020, 5:26 am

Send you a convo....Message me the website.

The IP is obviously leaking from a DNS bug.

Not anything related to your PHP coding.

Send me the website and I will take a look

I was told maybe it's being leaked by Apache? I don't know.
