Thread: [need help \(ready to pay\) to deobfuscate some data](#)

**mihran.sahakyan** - October 28, 2020, 10:50 am

Hi there!

need to de-obfuscate some text data (see below)

it shuld become clear text XSL/XML data

obfuscated by SAP B1 Integration Framework

can provide sample (source + pass + obfuscated result) if it will help

ready to pay ;)

**Demoralise** - October 29, 2020, 12:21 am

Hahahahaha fuck that is some serious obfuscation, there must be tons of encryption/encoding layers to get that output. My guess is that it will be next to impossible to deobfuscate this

**mihran.sahakyan** - October 29, 2020, 4:01 am

thanks for the thought anyways :) not hoping for much, but who knows :)

**?BADMAN?** - October 29, 2020, 4:43 am

Provide the source , we can't guess how this string can be decrypted.

**mihran.sahakyan** - October 29, 2020, 2:02 pm

Hi guys! sorry for a bit late answer, was having problems with obfuscation

here is sample source, obfuscation key and obfuscated result - pastebin, because forum firewall

does not allow to post the text here

[pastebin.com Dcxne8g9](https://pastebin.com/Dcxne8g9)

one more example - same data obfuscated with 2 different but very similar keys

maybe it helps

[pastebin.com Q0Zibj0m](https://pastebin.com/Q0Zibj0m)
