UPCOMING UPDATES

- 1) Soon our bot will also support video answers.
- 2) You will also be able to request your own questions to the Che-g-g experts.

There will be a different pricing for access to these updates!

Can I see a video example of this? And is it \$5.00 lifetime support?

It's \$5.00 per month, and the support will last for a month. In case of any outages, the days will be added to your subscription.

If the maintenance accessing solutions, I believe it will cause an outage on our side a swell.

Sent you a request on discord please respond when possible thanks.

Managed to get my hand on this thing, I must say it's absolutely insane! Usually takes about 10-15 seconds for the bot to go through your link and it DMs you a web page with the initial question (including pictures if any) the transcribed text and the expert answer.

Well worth it over buying a Che-g-g subscription especially at the current price point.

Are you looking for a partner/investor in this service? I am quite interested, if so. Seems like a unique business idea that could be expanded exponentially.

Hey, thanks for your interest. I'm afraid I'm not looking for an investor right now. If I will need one in the future, I'll let you know.

Thanks again and regards
