Mike Tyson projects a lot. I've seen him do this multiple times. Mike used to say wildly homophobic shit.

I can't even fucking understand them because of how much they change their voices to try and sound 'thug'.

I've listened to some of Tyson's podcasts and he is actually a very smart person. He just has a child like voice which makes everyone think badly of him. Also because he is a black fighter. In reality, he is a great person with a good attitude towards life.

I've seen about 7 of his podcasts. He is very strange but in a good way
