Thread: [How fast can you type? Let's find out who the fastest typers on HF are!](#)

Cooligan - October 29, 2020, 1:48 pm

Just as the title states, how fast can you type?

*Vote in the Poll above and select your typing speed range!

**Please keep it honest!

I'm also curious about what your average typing speed is, and what's the fastest you've ever typed? (WPM)

My averages according to a few different typing test sites:

Speed: 91-95 WPM

Accuracy: 93-96%

My fastest speed so far:

via: <https://www.typingtest.com/>

What about you guys?

Yeah you wish Mr "okay we're restarting" 3 games in a row.

7 - October 29, 2020, 1:55 pm

I dont type fast i use fiverr ahaha

Mr. Corleone - October 29, 2020, 1:57 pm

Another one of these threads :D

My record is 155 WPM. I've only done the test twice.

I'm pretty sure I can get to 170 WPM if I tried.

Yh dude I get my cat to type for me he is much faster. I am to slow to type anything fast.

znc - October 29, 2020, 1:59 pm

I type 120-130 using 10fastfingers.com

Going to try out TypingTest.com now

Right, we are very impressing with this come live stream in HF discord... so exciting.
Even more exciting than rubbing trees

I'll actually show proof lol, nothing to hide.
I'm working on a project, I'll show u tomorrow.

??e rando? d??c? g?y - October 29, 2020, 2:21 pm

On my old keyboard my record was 140~50 wpm, but now I can't seem to get more than 80 lol.

Wow mate, thats almost more than double my typing speed. My speed is currently just over 60wpm on my laptop but used to be higher when I used a keyboard on my PC in the past. Dunno why but I hate the buttons on the lappys keyboard, they slow me down. ?

Wow you type really fast brother...I might try it out when I got to be on my desktop :D

Mango™ - October 29, 2020, 9:00 pm

80+ because this keyboard is mechanical as fuck. If I were on my work computer, I would be at about 120+. Also, these damn special symbols are a pain in the ass lol.

Carbohydrates - October 29, 2020, 9:05 pm

Yeah just did 88 WPM, I also type with only 4 fingers, index fingers and middle fingers. My other ones are useless. The test I took had so much capitals and quotes, in a normal typing test without quoting and capitalization every other word I usually hit around 105 wpm

Grim - October 29, 2020, 10:35 pm

im like 85 but iv always been a very slow typer i dont type like your supposed to lol

Nico - October 29, 2020, 11:06 pm

I don't use my pinky when typing so that slows me down a lot. My highest is around 65-70 WPM. Definitely better than the average but not as fast as I'd like to be.

Cooligan - October 29, 2020, 11:47 pm

Idk what I'd do if I didn't type with my pinkies.

My right pinky is responsible for ' and " keys, the enter key, right shift key, and sometimes the ; and : keys.

My left pinky is responsible for the a and z keys, caps lock key if needed, left shift key, CTRL key (for things like CTRL + A/V/etc)

flavoral - October 30, 2020, 12:48 am

62.8 WPM if i remember correctly.

Some say keyboard worriers of SRPP section write at 150-200 WPM

I can't even play Guitar Hero or Rockband guitars with my pinkies. I don't know what's wrong, I just don't have the flexibility/muscle memory to be able to use them.

Gigabyte - October 30, 2020, 4:11 am

72wpm on my phone, yikes

Around 90-ish on my keyboard at home

I think I've got over 100 before on an Apple Magic Keyboard
