Situation: Bought his java crypter, CypherX on 25 July.

Wasn't FUD as soon as he gave it to me(whatever file you try to crypt ie:calc.exe). I was really disapointed.

He told me that he would make an update: of course almost one month later, nothing except random BS.

Spoiler ([Click to View](#))Xinfiltrate Wrote:-N3oP4L4d1uM- Wrote:Hey,

Could you please refund me, since you didn't update it.

Best regards.

no.. i will only refund you if i can't update it, i said i will so i will lots of things are just coming up so wasn't able

Moreover the crypter seems to corrupt my server: indeed I loose victims after they restart their PC even I change the server settings.

I will upload MSN history and PayPal proof + NVT scan as soon as I get a good wifi connection(using my iPhone edge).

n0tReanimation - August 14, 2010, 6:49 pm

I hope you upload the other piece of evidence.

Xinfiltrate was trusted when i bought his blueprint.

South Park - August 14, 2010, 6:51 pm

You should had known that a java crypter wouldn't be great

N3oP4L4d1uM - August 14, 2010, 9:00 pm

Xinfiltrate was trusted when i bought his blueprint.

This has nothing to do with his blueprint guide, I'm talking about Cypherx. If you look at his rep and other scam reports, you will see that he already had issues FUDing his crypter.

0x000011 - August 14, 2010, 9:12 pm

cypherx isnt detected.. you used the dam .jar to exe converter... and when it was detected i undetected it almost right away... listen you guys, hes just angry because in pm i told him the compatibility update is going to come in a week... and i guess that pissed him off

Spoiler ([Click to View](#))

[img]http://i38.[censored].com/2ujjk91.png[/img]

i stick to my word...

this is what i also mentioned already in thread before he bought that there is some compatibility issues but will be resolved in update...

AND not only has the sales thread been closed before he bought and not only did i already mention compatibility update to him.... don't let this guy waste your time.

N3oP4L4d1uM - August 14, 2010, 9:22 pm

Are you kidding me? It's detected wheter I scan the .jar created by CypherX or the .exe created by the converter. I know no updates will come like you did for your 'lifetime' customers that bought your previous crypter.

Code BlaiR ? (75) - Last updated 07-08-2010, 04:24 PM

Neutral (0): Java Crypter :/ Please Add In Your Post About The 40-60% infection rate.

Dark Coder (59) - Last updated 07-06-2010, 04:21 AM

Neutral (0): Scamming POS . I bought lifetime on his crypter, unlimited stubs, had it for 2 weeks, then he stopped supporting it. Your a scammer xinfiltrate

Westside (23) - Last updated 06-20-2010, 07:29 PM

Neutral (0): Scammer, Bought crypter \$40 assuming I would get the lifetime stub updates and lifetime support but this seller has not stuck to his promises. He has also binded a RAT to the crypter as I noticed a new registry key in MSCONFIG soon as I opened it.

Meth (128) - Last updated 05-24-2010, 10:22 PM

Neutral (0): Scammer in my book. I paid 20\$ now im supposed to pay another 8? Fuck off.

Demonz (51) - Last updated 05-21-2010, 11:06 AM

Negative (-1): Would like the crypter, I once loved back.

phire nuk3r (200) - Last updated 05-11-2010, 10:46 AM

Negative (-3): Bought this user ub3r for the cryptor. Not heard from this guy in like a month, then final get an msn asking me to wait longer, or pay another \$8 if i want it now. WTF is that about, Lifetime support my arse

[2012] (19) - Last updated 05-11-2010, 10:34 AM

Negative (-3): GREAT support :-(
hahajoke (121) - Last updated 04-26-2010, 02:04 PM

Neutral (0): Is not giving stubs for a lifetime customer. It's been over a month!!

???? (26) - Last updated 04-14-2010, 03:18 PM

Negative (-3): The quality of your crypter has been dropped.. stubs are no fuckin unique and get detected within a week (same as public crypters Smile) and you are still askin me to pay for a new stub Unsure -- It was a piece of shit.

-Creative- (2) - Last updated 04-09-2010, 01:51 PM

Quote:AND not only has the sales thread been closed before he bought
Then why did you let me purchase it, are you damn stupid... oh wait I know, that was to scam me with that imaginary update that will never come.

0x000011 - August 14, 2010, 9:23 pm

whats detecting it...?

and dont bring other stuff into this.. that crypters "lifetime" has ended.. its been going for months.. the few like you and those who reped me just cant accept that fact...

i sold over 800 copies.. what do you expect, of course a few people wont accept it, ..and only a "few" people didnt

1. im pretty sure i told you before you bought, i tell everyone
2. sales thread is fuckin closed and been closed before you bought,
3. i mention it in big green letters in thread

stop wasting my time and everyone elses.. someone please close this thread

MKM - August 14, 2010, 9:24 pm

Xinfiltrate, I find it kind of silly how you refused to give me your newer crypter (this was a while ago) after you stopped updating/selling your older crypter. I bought lifetime updates and the stub I received wasn't even FUD. I never even used the stub, and I never asked for another stub. So I wasted about 50 bucks... and you weren't even willing to give me your newer crypter. That's pretty harsh. Sure, you offered a discount, but why would I want to risk buying another crypter with detected "unique" stubs?

0x000011 - August 14, 2010, 9:26 pm

Imao!!! "File name: crypted-calcexe-jar" .. not even .jar you dam liar..

i have proof on my side its fud aswell.. can some mod please close this pointless thread now.. its obvious this guy is lying and just has something against me

N3oP4L4d1uM - August 14, 2010, 10:01 pm

NVT renamed it, crypted-calcexe.jar was the original name.
But no worries I will re-upload right now.

You are lucky NVT rename every .jar in -jar, everybody can check this:
just make a .txt rename it to .jar and upload it to NVT.

Anyway, I can show a mod via TeamViewer how crypting any file with CypherX make it detected.

Quote:1. im pretty sure i told you before you bought, i tell everyone
You never did, or if you did then show me where...

Quote:3. i mention it in big green letters in thread
Of course but you edited your thread after I bought your crypter, so what does tell us
that you didn't add this 'big green letters' after I bought it?

Quote:...someone needs to close this thread.. its pointless and wasting peoples time
Hahaha, NO sorry face the consequences.

0x000011 - August 14, 2010, 10:25 pm

ok well if it does rename it then you just dont have the undetected updated version... which i gave
out like a few weeks ago.. msn me for it..

and to everything else you said they are all lies and if they arent well show me proof..??

Slenderman - August 14, 2010, 10:32 pm

I know, im not part of this,

But i just read this whole thing.

And n3o i hope you get your money back.

Seem like, Xinfilt never supports so called "lifetime", call's you a liar because you actually have
proof, and more.

Good luck getting your money back.

South Park - August 15, 2010, 8:53 am

Its a NVT glitch, the exact same happens to me on my crypter along with all other files. Its normal.

Wise - August 15, 2010, 9:00 am

This guy shouldn't be here with the things he is pulling. I will give you the fact that the "lifetime" of
the crypter ended, but people that brought at the end of the period should get a refund or a big
discount on the next product.

And this java crypter doesn't even do the job after waiting so long. Instead he sells his eBook on
crypters, how you make an eBook about it if you can't maintain your own?

He doesn't even know about how NVT.org renames the file, which is kind of funny to me.

None of his crypters had the binder feature, how can you sell a eBook about crypters when you couldn't even add a binder to your crypter?

And he also takes everybody's email and email them about the java crypter (only happened once). But he keeps a big database of HF members email.

Dark Coder - August 15, 2010, 9:04 am

xinfiltrate is a BIG scammer, I bought his crypter about 2 weeks before he quit, my stub was not even FUD, and I got the lifetime package, lifetime being 2 weeks and a fucking detected stub.

FUCK YOU XINFILTRATE.

0x000011 - August 15, 2010, 11:05 am

(Aug 14, 2010 10:33 PM)Framed Wrote: [\[CITE\]](#) We can't close it until the OP confirms things have been settled. For the moment, we have to see what the outcome is, so far, you guys look like you're trying to settle things, so once he PMs me, I'll close it or he can do it himself anyway. I'll close it if their are enough information, but so far, there isn't.

i gave him the updated undetected version that he didnt ask for before already..

also ..on the side note, let me just clarify.. all those kids who are trashing either just got summoned by the owner of this thread or they just cant accept the fact and understand what i meant by the lifetime of that old crypter has ended... which has nothing to do with this thread

Neroxan - August 16, 2010, 3:15 am

People read "lifetime" and automatically understand that as being the entire period that they will be alive. They dont care if you died 20 years ago or your crypter kicked the bucket last week either, they want updated stubs plox and thats it.

Although Ive gotta say, the bit about the vb crypter being too detected to be usable anymore is bullshit. They can ALWAYS be undetected when using the proper methods of doing so.

And the fact that a/v's are recognizing cypherX's byte code sounds like bullshit to me too. It takes years and years for malicious java code to be detected, which leaves me willing to bet 20:1 that cypherX was actually built in jabaco and not java and thus is why it has been detected so fast.

NaDe - August 16, 2010, 6:13 am

Never use "lifetime", It is impossible.

Dark Coder - August 16, 2010, 9:15 am

Let it be impossible, I never expected to have the crypter more than a year or two,

BUT SERIOUSLY, I have it for 2 WEEKS, I get 2 stubs, which were both fucking detected,

He was never online to replace my stubs, WHAT THE FUCK.

I'm seriously pissed, and Xinfiltrate has scammed 1 to many people.

Torrance - August 16, 2010, 10:19 am

Vouch for xinfiltrate. I bought his previous crypter and had no problems.

Hatchine - February 3, 2011, 2:48 am

Bump, just bought this Java crypter, yes without reading scam section (dumb)

- Not Fud 3/33
- Corrupt every servers, darkcomet, Spy-net... with install+boot on, configured in the Rat
- Don't restart with HKLM option of the crypter.

When i see he continue to scam his shit, on crypters.net, and here with the Banner at top, i rage.
If need proof i can give them.

!Currency! - February 4, 2011, 3:57 pm

The crypter is fud... this is my server made fud today.. as i have just recieved an update today...

[\[IMG\]http://img691.imageshack.us/img691/2341/cypherchecked.jpg\[/IMG\]](http://img691.imageshack.us/img691/2341/cypherchecked.jpg)

Uploaded with ImageShack.us

BUT i am not sure about the servers working etc because i have had problems with my Blackshades..but im sure it is solvable.. it usually is.. and im sure you should have an update soon.. providing you signed up for the email bulletins from them when you got your crypter?? Anyways hope all goes well.
