Yup PC only, however you can use REWASD and plug in your controller.

It's what I do and honestly works fine.

Some of the other guys I'm working with offer camos, emblems and all that good stuff...however i will not be bringing that on site for a few weeks.

Have to prepare for Cold War :)

Very good question. Yeah I always recommend a HWID spoofer and we offer monthly and lifetime.

I offer full instructions and tutorials. We also have a very active telegram and forum where a lot of members can help out. Once you purchase from me, I work with you side by side till you got the cheats working.

Me personally I don't have it running and haven't been banned yet using the cheat, and I've raged a few times.

I'm like level 80 on this new account with several dubs and high kill games. Also using controller.

Hi, thanks for purchasing and I am glad you're enjoying our services.

ANYTHING you see on our site, you come through me and our lovely HackForums, I will give you a fantastic price <3.

I am eager to see your review :D

**gsoundz** - November 8, 2020, 11:32 pm

Purchased the 24 hour pass, within 15 minutes of having access to the download links I was in game and ready to play! The settings took a game or two of tweeking and even a look at some of the other users settings on their forums to almost perfect it! But after doing so I love it!

Overall would definately recommend to anybody who wants inexpensive warzone/mw cheats!

What is the ban rate of this cheat ?

**Money Man** - November 9, 2020, 7:26 am

(Nov 9, 2020 08:17 AM)Yajat Wrote: [\[CITE\]](#) What is the ban rate of this cheat ?

People get banned, not going to sit here and tell you that my cheat will not get you banned.. however it is UNDETECTED. Anyone that tells you their cheat has a 0 risk of getting you banned is plain simple lying or as I like to say CAPPIN.

This really depends on you, we have to take a lot of things into factor. I've seen accounts last from a minimum of at least a few days of raging to people still playing today with hacks from season 1 (Yes, we have MANY people who have been with us since season 1 and they are still playing to this day on the SAME account.)

Always using at your own risk.

This private hack is 100% undetected as anti-cheat has no access to our kernelmode ring0 driver technically, BUT you can become banned/flagged for following reasons:

- you did not check cheat status & used an outdated version -> ban
- you loaded the cheat incorrectly (if you dont follow the #install) -> ban
- your game crashed due missing #requirements -> ban (crash reports will be sent to the activation servers)
- you got flagged for using other detected cheats before -> delayed ban
- you got flagged for using scripts or services such as spoolers/bot lobbies/unlock achievements/attachments/perks etc. -> ban
- you got flagged due tracking gameplay information (suspicious gameplay/stats/k/d/headshot %rate) -> shadow ban

- you got reported for cheating blatantly/obviously with too high FOV/Speed Aimbot and/or ESP (looking through walls) -> shadow ban

- Admins or Game developers can always watch you and ban you manually -> ban

-> The way to avoid any flag/ban is to play like a human, that means the less blatant/obvious you are, the less likely you are to become flagged/shadow banned.

For me, I rage and I still have not been banned or put into a shadow lobby.

Alright so i'm a little late with my review, and completely apologize for how long i've taken! The support that is given to me is phenomenal, I've had nothing but consistent communication between Money Man and myself along with my brother @Gsoundz. The price is really not bad at all, considering it his warzone cheats and there typically alot higher in price.

Alongside customer service being amazing, I've had absolutely no issues with the program so far! have personally used it for 5 hours straight no issues( on my 24 hour trial I purchased 2 days ago), and now have repurchased a week's membership as i've had no complaints with them. A1 Program, A1 customer service. and a damn good price? what more could you want!!!

Will leave pics/Vid in this shortly for OP to add to his thread. Thanks again Money man!!!!

**Money Man** - November 10, 2020, 8:58 pm

Hi thank you for the vouch.

Posting to come back later, definitely interested. I spent \$150+ last month on Warzone & HWID cheats I could never get to work. Made 10+ accounts and they'd get shadow banned every time before the first match, absolutely horrible and was from an extremely reputable site. I even changed hard drives and other components and my IP but nothing, so if you have advice on that front let me know if not I'm waiting until I get a new machine. Not sure if you're a reseller or not, private message me if you're a technical guy.

Damn sorry to hear that your cheat providers are not helping you out.. in a situation like this id work with you alongside with others to ensure you're getting it working.

From the sound of it, your HWID spoofer is not working.

Come try us out, I am sure you won't regret it.

P.S, If you want Pm me your cheat providers, I most likely know them.

Appreciate the kind words, we aim to be competitive on the pricing + provide the best quality cheats on the market. This thread is still in development on HF, but our community is very tightly packed with a lot of members who are willing to help. We also have two active developers (one is a partner who is HEAVILY devoted in this cheat) and we push updates out within 30-45 minutes TOPS.

Also, if for any reason you can't get the cheats working I will refund.. however when you purchase I work with you side-by side till you have the cheats running, all that is required is a USB and a compatible Windows version. Installing the cheats is very easy, the whole process I'd say takes 30-45 minutes to setup tops.

Let me know whenever you're interested, come back in a few days and you will see videos + the thread design :). We also offer HWID Spoofers.

**Money Man** - November 11, 2020, 7:05 pm

Today a pretty popular cheat provider got detected, anyone who comes from us from this certain provider will get a discount..

Stay undetected boys and run with the best HWID Spoofer and cheats on the market for Call of Duty Modern Warfare. :)

**Money Man** - November 11, 2020, 9:16 pm

Thread design implemented. I will have videos and screenshots up soon along with a FAQ

**Money Man** - November 12, 2020, 8:50 am

COD Banwave 12th-November 2020... Many cheat providers got DETECTED. As of 11/12/2020 COD Warzone/MW is still 100% UNDETECTED and NOT affected by any banwave. Thank you for your trust in our products.

Anyone coming from others providers and can prove to me, I will give a 10% discount for the switchover, maybe more depending on your package.

(Nov 12, 2020 05:24 PM)dXtr. Wrote: [\[CITE\]](#) So its an internal hack. You use a driver but claim no injection? ?

"Specialized Technology"

Honestly this sounds like a big scam just from your wording. Either you are not the dev or your dev did not proof read this because no cheat dev would ever write such a bs

You didn't even buy the product but yet you got a lot to say, interesting..

No, it was written as intended, may be a little hard for you to comprehend but we don't utilize .DLL files. You load the loader onto a USB and once on COD you eject the USB. The text has been on our site since the first day of sales and was written by the developer/partner himself.

Whats wrong with that? We are not forced to reveal more detailed information about the technology we are using, although we stated that its a kernel driver (there are plenty ways of initializing kernel drivers) and we are using a special technology for that. You shouldnt talk when you clearly dont have any knowledge about that stuff.

If you think it's a scam

- 1) Don't buy.
- 2) Buy with a middle-man..

I am not interested in running off with a few bucks. If you are dissatisfied with the purchase I'll refund you.

Hi, unfortunately stream mode stopped working after season 5, its disabled as of now.

Our head developer is working on bringing it back, but being honest focus has shifted to getting a Cold War cheat out.

**Money Man** - November 13, 2020, 4:35 pm

This is a FRIENDLY reminder to all active customers. Please do not use the loader on Cod Cold War, you will be banned.

We will have a different sales thread + product for that, DO NOT use our loader on Cold War. This is meant for COD Modern Warfare.

Thanks, happy cheating lads.

Nothings stopping you from going to those providers and you are correct, some have already released a Cheeto for Cold War. However, we're taking our time with our development, it is still in the works and should be out soon. I will be posting another thread for that service.

We aim to be competitive with our pricing, almost all my customers through HF + our site have been consistently re subscribing for a reason. Would love for you to give us a shot, let me know I could work on the pricing a bit for you but I believe it's well worth the price.

Just because youre not using dll files doesnt mean there isnt being code injected idiot. There is literarly zero posibility of internal cheats working without some way of code injection so what you are doing is plain wrong and you are lying to everyone. Hi,

Modern Warfare has been merged into Cold War, as many of you know.

For our lifetime subscribers:

Unfortunately you have to upgrade, but we offer a very high discount for the upgrade as Warzone CW & MW are merged now.

Your product xmodus CoD Warzone/Modern Warfare includes only support & unlimited updates for Warzone with Modern Warfare integration, but since 16th-December Activision introduced a separate update for Warzone with Black Ops Cold War (SEASON ONE) integration.

Thank you for your understanding

It will be 30\$ to retain your lifetime services on Modern Warfare AND Cold War, this will also include Cold War MP.

Hi,

Not streamer proof at the moment, lost its ability a few seasons ago. Will probably be updated in the near future to be steamer proof.

You would need a remapper to use controller, I personally use Rewasd with my PS4 controller and have no problem with using the cheats.

If you're just reselling a cheat from elitepvppers, why do you keep saying 'we' when talking about the features or the slots as if you worked on it? As far as I see, the "limited time" slots have been offered for a very long time and I don't see them turning anyone down.

Doesn't matter to me if you buy from elitepvppers/ on our site or elsewhere..

and we just opened our slots back open (lifetime). It's going to be closed again after a few weeks of dropping Cold War multiplayer.

Cool you've been keeping an eye on us, appreciated :)

Not going to sit here and tell you people don't get banned, lol any cheat provider telling you anything other is just straight up lying.

We're an undetected CHEAT, but there are many ways you can still get banned.

## // DISCLAIMER

-----

Always use at your own risk.

This private hack is 100% undetected as anti-cheat has no access to our kernelmode driver technically, BUT you can become banned/flagged for following reasons:

- you did not check cheat status & used an outdated version -> ban
- you loaded the cheat incorrectly (if you dont follow the #install) -> ban
- your game crashed due missing #requirements -> ban (crash reports will be sent to the activision servers)
- you got flagged for using other detected cheats before -> delayed ban
- you got flagged for using scripts or services such as spoofers/bot lobbies/unlock achievements/attachments/perks etc. -> ban
- you got flagged due tracking gameplay information (suspicious gameplay/stats/k/d/headshot %rate) -> shadow ban
- you got reported for cheating blatantly/obviously with too high FOV/Speed Aimbot, No Recoil and/or ESP (looking through walls) -> shadow ban
- Admins or Game developers can always watch you and ban you manually -> ban

-> The way to avoid any flag/ban is to play like a human, that means the less blatant/obvious you are, the less likely you are to become flagged/shadow banned.

Hello there,???

Since you include "Cold War" on the title, what feature does include over there?  
does it comes with zombies spawn features?

Cold War MP & Warzone. It's not a tool for Zombies :)

Extremely professional and reliable service. I'm extremely impressed and me and my boys will be conducting business with you again without a doubt. Very aesthetically/functionally clean program, efficient, and easy to use. Also very easy to keep yourself undetected with some tweaks of the settings. Got quite a few high kill games. I highly recommend this to anyone looking for a trustworthy vendor and excellent program.

**Stride** - January 29, 2021, 5:51 pm

Might be interested in a couple of weeks.

Yes, I don't see why not. As long as you can turn off the anti virus / able to turn off real time protection.
