CUPIDBOT UPDATES

I have made a support server, implemented many stability fixes and it now works on RDP, in the support server I am writing many guides on botting strategies, I also have a new method for creating [BRAND NAME REMOVED] accounts in arbitrary locations which you will get when buying the bot.
VOUCH COPIES 2/3

DESCRIPTION

CUPIDBOT AIO is an all in one bot that supports 3 different dating sites, [BRAND NAME REMOVED], [BRAND NAME REMOVED] and Badoo (barely works), it is multithreaded and works on Windows only, it has an option to save all the info you can get from your matches into a CSV, including Name, School, Workplace, Facebook and more, you can also save the photos of your matches, it has a proxyscraper built in and a maps system so you can view the coverage of all of your [BRAND NAME REMOVED] accounts.

There are 2 reviews on here and dm me if you want some more info, a lot of the reviewers kinda just took there copies and ran lol

1eye - November 9, 2020, 4:06 am

Edit:

I got a full refund

The bot simply does not work, it can only swipe left and right. The dm system did not work. The login system to get acces to the bot was badly written, the program takes up a lot fo resources for something so small as that.

- Maps did not work
- Auto messages did not work
- Very unfriendly UI

Tbh the bot could be something properly if someone who knew how to code would write it

Old reply:

Quote:Bot is trash

UI sucks

Does not mass message

Only autoswipes

The coder of this bot clearly just tried to paste this stuff together. Flawed as hell giving it a 0/10

Others already dm'd me asking if all this stuff doesn't work for me either

I'm sorry you're having trouble with it, you said you either wanted it fixed or a refund, if you want a refund I'm more than happy to provide one, for the record I've sold 5 copies and haven't had really any complaints. Some parts are definitely not super stable on every computer and setup but I've always provided as much support as possible to get people up and working, FYI I'm working on several updates that should improve everything but again, if you want a refund just let me know.

Stanley - November 21, 2020, 11:57 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
