Ahoy!

I'm new to E-whoring and some expertise would be greatly appreciated.
What apps and sites should I use to get the most customers?
Also how should I go about selling?

Thanks in advance!!

Use your mind... No one here is going to give you their sources. What websites do the horniest guys with the big pockets visit?

You should use [BRAND NAME REMOVED] and Twitter

nobody will give you their best ideas for free. the best ideas are private because nobody/few other people are using it.

There's no magical place where everyone is a buyer. I've gotten long time buyers from the worst sources. And I've gotten timewasters from supposed high quality sources. Work on your game so that you can convert almost anyone no matter where you find them.

Learn the basics, get a good pack, get some traffic sources, improve your SE skills and then just profit.
