Options Risk

Options come with risk as with any trading does. However, the amount of risk and volatility that it pertains to is much larger than traditional investing. Options are a great way to turn a small capital account into a large one, although under heavy risk. Risk management is something that you **MUST** exercise in order to be successful while trading.

Options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the options markets. Do NOT trade with

Options Trading involves substantial risk of loss and is not suitable for every investor. Only you can determine what level of risk is appropriate for you. Pretty cool thread, even though I am not looking to purchase but as an options trader, I do like what you're doing by lookin at that excel sheet screenshot. Good luck with sales.

Yes, it's the same thread, they are proxy selling for me.

I own the group not AIBot or Trappy, they are both proxy selling for me. Regarding your claim on "scamming", the group is legit with lots of proof and screenshots + discord chat history to back it. You can even view our success on <https://twitter.com/AstroTSuccess>.

There hasn't been a single scam report regarding our service. AIBot is banned for another reason which hence I'm looking/using another proxy seller.

Absolutely stellar signals lately, including a +500% on a btc call.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
