Thread: [Loaders](#)

BobLarsers - November 5, 2020, 10:53 pm

Hello everyone. I'm currently looking for a good loader that i can bind to an excel spreadsheet, upon executing it will act as a placeholder so i can then run/execute any application in the targeted system as i please. I'm looking for a very good loader as i am willing to pay a reasonable amount. I'm looking for something similar to the malware loader known as "More_eggs" aka "Terra Loader"

Things you can buy.

Raccoon Stealer (Extra "Best UI")

Spoiler [\(Click to View\)](#)

Smoke Bot

Spoiler [\(Click to View\)](#)

DiamondFox

Spoiler [\(Click to View\)](#)

Now just google to find more info.

That is something you need to decide. I don't know what your intentions are or I don't know what your looking to do with it.

Honestly don't even want to know but search google < find which one has what options | check forum reviews.

If you need official links to a certain product feel free to ask.
