Thread: [Need help with VPS/RAT \(Open ports still closed\) Reward:10\\$ BTC](#)

D33PWEB - November 6, 2020, 5:54 am

Good day everyone!

Nevermind, closed.

I never though I would ask such as stupid question on here. As this has never happened to me before. So I tried to open ports for the Morphine rat on the vps and just to play about with it and remember the old good times "LOL"... Even though I open the ports on the vps it still doesn't work and shows closed on the canyouseeme and so I cannot get the rat running. Any ideas? Who has some spare time and can sort this out Ill give 10\$ in BTC. Thanks.
follow this [thread](#) and it will help you out.
