Thread: [Looking to build gaming PC - 2,000 budget](#)

Rsky - November 7, 2020, 1:40 pm

I'm foreign to building PCs but have watched many videos so I have some understanding.
Looking for help to pick parts with a £2,000 budget.

[www\(dot\)YouTube\(dot\)com/watch?v=GYI8c89aZ98](http://www(dot)YouTube(dot)com/watch?v=GYI8c89aZ98)

I like this build but some of the parts listed are out of stock.
Also, I am wanting that case so please include this.

Will be primarily used for gaming. I do not stream, video edit, etc. but am wanting something that is future proof.

Fortnite and COD will be the main games played.

Any help is appreciated.

rx 6900 xt + ryzen 9 5950x or other cheaper new ryzen CPU ?

Yac1ne - November 8, 2020, 10:25 am

This will cost you more or less £2000, the graphics card and the CPU are currently out of stock, as for the CPU, you can either wait for it to become available, or just get yourself a 3900x if you can't wait, it's good enough, and as for the graphics card, you can also wait for it to become available if you're not in a rush, it's a pretty good deal, or wait for the new rx 6000 series from amd, they look promising, and they'll be out November 18th, good luck

PCPartPicker Part List: <https://pcpartpicker.com/list/WG2Rvf>

CPU: AMD Ryzen 7 5800X 3.8 GHz 8-Core Processor
CPU Cooler: Noctua NH-D15 82.5 CFM CPU Cooler (\$89.95 @ Amazon)
Motherboard: Asus TUF GAMING X570-PLUS (WI-FI) ATX AM4 Motherboard (\$179.99 @ B&H)
Memory: G.Skill Trident Z Neo 32 GB (2 x 16 GB) DDR4-3600 CL16 Memory (\$173.98 @ Newegg)
Storage: Samsung 980 Pro 1 TB M.2-2280 NVME Solid State Drive (\$229.99 @ B&H)
Storage: Seagate BarraCuda 4 TB 3.5" 5400RPM Internal Hard Drive (\$89.99 @ Newegg)
Video Card: Asus GeForce RTX 3070 8 GB STRIX GAMING Video Card
Case: NZXT H510 Elite ATX Mid Tower Case (\$149.88 @ Amazon)
Power Supply: EVGA G3 850 W 80+ Gold Certified Fully Modular ATX Power Supply (\$173.97 @ Newegg)
Total: \$1087.75
Prices include shipping, taxes, and discounts when available

Quick note, you can use <https://uk.pcpartpicker.com/> to get UK prices instead of converting American prices.

That would be over budget, due to only have 300 left for the rest of the build
