Thread: [\[FREE\] Database Search Engine Web | 10,231,651,731 Records | EMAIL | USER | PASS |](#)

Corruption - November 7, 2020, 5:15 pm

Search through our 10,231,651,731 records to find out!

Info: A friendly service/board is offering a fully free database search engine service.
So I got the permission from HF staff to share it here since many users still pay for such services.

According to them as long as the service is not abused it will stay public and free.
Respect it and do not search for dumb things what will cause 2 much server load.

Great tool, thanks for this OP!!!

Corruption - November 8, 2020, 12:21 am

Happy to have shared it with you guys ik some people might of needed such a free service.

Exalted - November 8, 2020, 12:29 am

Great share [Corruption](#) , I already found some useful credentials. Thanks!

Fortunate - November 8, 2020, 12:38 am

Great share, nice to see a service like this being provided for free.

Good work, Corruption.

Pretty cool service??

I also support the idea of launching the service only for HF members

Well that is something HF stuff must do, I don't think the guys running this service will be down for that lol.

I had to ask the owner before sharing with HF, he just wants to make a service free and do something good for a while until...

Some idiots start abusing the service lol.

Skisuit - November 8, 2020, 2:24 am

Many thanks for sharing this with us, I've just sent them an email for an invitation code, can't wait for it!

This website is extremely beginner friendly as it's easy to navigate and does its job well. Its loading time is really fast as well, each searches takes at most up to 2-3 seconds, which is really impressive.

Highly recommend for everyone to try this as well:)

I understand your disappointment ... some people can't respect you doing something good for the community. Sometimes I get the impression that we live in an underdeveloped zoo and not among people?

Respect for you for the work put into this service???

All the best to you in this difficult time for all.

I found a few passwords of mine I didn't know were leaked. Luckily to nothing too serious and I always have 2FA setup.

Pretty good database here. Guessing this was just a bunch of leaked databases compiled?

The service is not mine!

As I know searches are not logged, and even if they were who cares it does not require an account to do searches, so no one could tell who searched what.

I have used it and it seems good, found nothing on a few emails I own.
