Thread: [RealVNC Server - Enterprise Key](#)

R1cky - November 8, 2020, 8:40 am

Yo folks,

no big introduction text or something.
I am selling you a RealVNC-Enterprise Key.

I got it from my boss at work years ago, and since then I am using it anytime for private or business/commercial uses.

It is a volume license key which expires in the year 2027. It is licensed for still more than [yeah check the pic] devices, so I thought I may share it with you guys.

Like I said, I am using this key for almost 4 years in business or private environment without any kind of problems.

Just use "Offline Activation and everything works fine". It is not license on any specific version, so you can just go on their website, load the current version and start straight on

Check the screenshot:

If there are any questions just ask me.

Please post it in the thread so my mailbox stays clean, and if some people may have the same question they can read it here.

I am looking for 5\$ / Key.

Crypto preferred.

I will give out 2 keys for free for some trusted, active members.

Greetings,

Cosmo_Kramer
