OP has given an easy guide everyone can follow, you basically just get the idea, execute it and profit.

This method works and applicable worldwide.

You don't need any more vouches to review, the OP mentioned everything you needed (seriously).

The method is a good side-hustle for extra \$\$\$ every week (if you followed and researched correctly, yes even in a day but mostly in a week).

For the price that OP has put on his package, I consider it worth it and will definitely not disappoint you.

Good luck potential buyers, and Thank you OP for giving me a chance to review.

The guide gives an in-depth view on this method with plenty of tips to help you get started, it's definitely worth checking out if you're looking to make some nice income on the side. How much you make depends on how much you work and how much you are willing to invest, but you will get your money back if you follow the guide, which shouldn't be too hard since it's structured beautifully and easy to understand even for new users.

Final thoughts, with a drop of patience this can be a really nice side hustle, at this price, it's a steal.

Method:

This method is pretty straight forward and can be easily set up by anyone, worldwide. The investment you'll have to make is quite low, and you're almost guaranteed by following Herion's advice and methods to make a significant profit on it with very minimal effort.

This uses an ever growing market that is ultimately still in it's infancy, meaning that this can be a consistent money making method for you long term without any risk of saturation.

The ebook's layout is very clear and the whole thing is very readable, I was able to grasp the method very quickly and the grammar throughout is good.

If you don't understand anything/need help, he does offer support via HF / Discord so you shouldn't have any issues.

Price:

This method is very competitively priced and honestly one of the best on HF, despite costing only \$30 for the premium package. I'd highly recommend this to anyone looking to make money while sitting in their room, so long as they have some extra cash for investment. I strongly believe anyone could make money using this method and with the provided support you should be able to scale this easily from your initial investment.

Final Words:

I can honestly say this is one of the best methods going on HF, and for the price to get such a HQ whitehat method and quality support for less than \$30 currently is incredible value.

I wish the best of luck to any members who decide to purchase this and give this method a go, I'm sure you won't regret your purchase.

Lastly I'd like to thank Herion for giving me a vouch copy of this method, and his patience as he waited for me to leave the review of this product.

FAQ

Q. Are there any investments required?

A. Yes, there is, since you will be reselling real HQ, in-demand products you need to buy those. You can start small, and chances of failure are low, 100 dollars should be enough.

Q. Can it get saturated?

A. Nope, I believe this niche is impossible to saturate. There will always be demand, high demand. Not a lot of people are catering to this niche at the moment, so more money for us.

Q. What is the time needed to execute the method and see money?

A. Setting up can take a bit of research, in general you could pull the trigger within a few minutes and start earning right-away. However, that is not recommended, this is not a get rich quick type of thing. You will be building a scalable business.

Q. Can this be done absolutely anywhere in the world?

A. This method will work anywhere in the world.

Q. How much money can be made?

A. Technically unlimited amount, I think it would be realistic to aim for something like 500 a week. You can easily scale this when you get more knowledge about the market.

Q. How many pages is the eBook?

A. The eBook is 17 pages long of pure knowledge and valuable information.

Q. How long does it take after purchasing to receive the eBook?

A. After purchase you'll be able to instantly download the eBook, it will also be sent to your e-mail.

Q. Does this have anything to do with dropshipping, Shopify or anything related?

A. Nope, it does NOT, you won't even need your own site!

Gold package includes a Refund option but the TOS states "By purchasing you automatically agreed to purchasing a non-refundable product."

This is a bit confusing, you should make it clear whether or not a refund option is available. If it is, you should also state clear terms for what is required to be able to request a refund.

I read the vouches left on your thread aswell. Only one of them was informative and actually gave a clear review of the method, but didn't include payment proof.

If you need a HQ review of the method just Hmu. I'll include payment proof etc. I believe this will boost your sales. (Actually I decided not to purchase this because of this exact reason). Let me

know, if not I wish you good luck with your sales! :)

Looks interesting but I have some questions.

1. Where can I sell the items? eBay? Amazon? As you say you don't need shopify/own website I guess these 2 are the selling platforms.

2. You say it works worldwide. So the items I have to buy are available in every country? I mean, if the items come from USA and I live in EU, then the seller might not even ship to me or if he does shipping is extremely expensive.

3. It is not dropshipping, so I have to buy the item and list on ebay. But what if it does not sell? Well, even if it is a top selling product this does not necessarily mean it will sell. If there is high competition and my listing is ranked poorly or my price is too high I lost my investment.

Hey, thank you for the questions!

1. You can sell them on eBay but also on niche related marketplaces.

2. Yup that's true, shipping cost can get relatively expensive, however it is worth it.

3. We take necessary measures to only purchase items that will sell 100%, we have ways to measure the popularity of an item before purchasing.

Also the location where I'm at does matter, here the marketplace for this things are not very good. :|

Wish I could get a refund, but not liking it and already knowing about this type of things wouldn't be a valid reason to qualify for a refund I assume.

Ok sounds good. But where do I buy the products from? USA? I am located in EU, so if i have to add shipping from USA to EU to the product nobody will buy because price will be too high then. Also as it is not dropshipping, I am limited to only selling it in my country. Because again if I sell to other countries I highly doubt buyers will pay high shipping fees.
