Thread: [Lost clients Due to Ip Changed](#)

jimbojonn - November 9, 2020, 2:40 pm

So I recently reset my router, and with it, my ip has changed. It is the one that I use for noip and all of my clients to connect back to. Is there any way to get my clients back? or to spoof my external IP?? Please help, would be MUCH appreciated!

FractumSeraph - November 9, 2020, 3:21 pm

You said you use no-ip right?

Log in to your account on noip.com and change your hostname to your new IP address. Then they will come back after a few minutes.

That's one of the main reasons people use ddns addresses.

Is the same port that you used before forwarded on your router right now?

bangerman36 - November 9, 2020, 6:59 pm

what ports are you using to connect to your clients?
