Thread: [Google Maps tour of the original Google garage and house](#)

So I was browsing the other day and randomly stumbled upon this gold mine section of Google Maps, and possibly the only house on Google Maps that you're able to fully tour the inside of, or go inside at all.

This will allow you to tour the whole entire original Google Maps garage and house, as well as the outside of course.

I believe this is all from 1998 judging by what's on the computer screen in the garage.

Here's a preview of what the garage has to see inside of it:
