[E-WHORING] Holy Grail Chat Bot Method - Appraisal needed

Hi I've been e-whoring for a while now and make 300-500 a month from it.

I'm a programmer building an e-whoring tool that I'm looking to sell along with an e-book that bots [BRAND NAME REMOVED] api and snapchat and automates the traffic building part including the chatting and talking with possible matches and re-routing them to my premium snap chat.

An additional feature I want to add over the next few weeks is using snapchat from my desktop so I don't have to use my phone for this and can use packs for sending pics instead of filters.

Do you think HF would be interested in something like this?

I'm not too familiar with the e-book pricing out there as I have never bought one and have completely built my methods on my own. What would something like this go for?

Hey, I'm glad you aren't trying to scam by saying outrageous things like \$1000/day, etc.

I think that honestly, you could probably get somewhere around \$25-50 for the tool, depending on how good it is it might even be a lot more.

I'd be down to test out the bot and write an honest review, so let me know if you are looking for any beta testers that could more accurately assess what you have on your hands atm.

Even if not, I am still interested in networking with you regarding your programming skills, please PM me your discord or preferred method of contact.
