Thread: [Youtube Glitchy? Subs disappearing](#)

Spiritual - November 12, 2020, 6:43 pm

So i refreshed my analytics and nearly 2k subs just vanish lmao I know for a fact they didn't unsub and they are all indeed real so is this like a glitch are they gonna show back up in a few hours ?

youtube has been buggy these past few days, give it about a week.

If not, I'd contact youtube to see what happened.

Also, check on another browser on an alt account and see if it's there.

It's not that big of a deal but if it keeps happening I'll definitely contact them I'm just hoping they pop back up tho because that's messed up last time it happened it was like 100-200 subs and I was annoyed but whatever but 2k like that's super annoying right before a mile stone

Are they bottled or did you buy those subscribers or real subscribers that drives on your account?

It depends on how you got your subs .Have you got your subs by traffic or did you buy them from a source?

Great to hear that those were real followers.
Have you reach out with youtube and raise the problem on their end?

No not yet I'm assuming the app is just glitchy but if it keeps happening I'll definitely write an email to their support but everywhere I read it says they "purge" accounts every 3 months or so but they let you know when they do that In studio. So I think it might just be a glitch since I'm gaining a lot right now well at least I'm hoping

That was pretty bad...I am hoping you will get them back as soon as possible.
Good luck on your youtube journey bro, all the best for you.

They're followers from another platform doing a giveaway to transfer so I know they're real but I was thinking it could be old subs and a purge maybe? But this happened the other day to but with a much smaller number of 200 so it can't be that and when they do purge they normally say it on the studio
