Thread: [40% ROI in Nov | Crypto Trading Bot](#)

Mr Kewl - November 16, 2020, 9:44 pm

Hello Hackers,

I'm using an invite-only bot and these are my results from 1st Nov to 17th Nov.

It automatically opens long & short positions for BTC, ETH, LINK, XRP, XTZ.

Results are for BTC, ETH, LINK.

I have only 2 invites for the month though. :)

SIM-888979 - November 16, 2020, 9:54 pm

Bots are definitely the future, no room for emotional trading.

Mr Kewl - November 16, 2020, 9:55 pm

Indeed.

We are too emotional, including myself to do anything rational. Lost and gained a lot of money on my instincts, haha.

FFcom - November 16, 2020, 10:57 pm

Looking good...

What would be the minimal investment for such a bot?

Bob White - November 16, 2020, 11:49 pm

What would be the minimal investment for such a bot? Hey so honestly it depends on you and the platforms like Bitfinex, Binance, Bitmex etc. But I'd suggest to start with a \$1000 at least. :)

Greetings,

I am curious, considering I keep track of most of the trading related things on this forum. Could you share some more info over DM, please.

Thanking you in advance.

Regards, Wolf.

Rishabh - November 17, 2020, 12:09 am

What trading strategy does the bot use? Is it anything to do with Fibo/Martingale?

K1. - November 17, 2020, 2:57 am

Wow man nice work!

Bots are the future, how does one find an invite for such a bot?

Money Man - November 17, 2020, 7:22 am

WOW.. another wonderful trading bot.

Let me guess, will this be in the market in a few weeks for us to get a 40% ROI as well?

Is this a sarcastic Comment?

The bot is live, but it's invite only!

Tak - November 17, 2020, 9:40 am

Makes me so happy to see Tezos on that list. XTZ has been my baby!

Mark Ronson - November 18, 2020, 3:58 am

Will invites for this ever be for sale? :)

xbryan - November 18, 2020, 5:53 am

If you can really do that consistently, i would loan from a bank or some p2p lending and then grow the money with your bot.

It's better to focus on scaling your method rather than inviting people to the bot.

jbpas - November 19, 2020, 2:21 am

Agree with above, if you have consistent results, just leverage to infinity and keep it growing XD

Sugawara - November 20, 2020, 3:21 am

Looks neat. We need to talk soon!

hosmail - January 10, 2021, 6:18 am

Congrats OP.

Profits look real good.

Any spots for the bot left for this month.

Sent you a PM :)

iMario - January 10, 2021, 6:50 am

Awesome earnings brother, how's the bot doing now?

Sudsy - January 11, 2021, 1:27 am

Maybe you answered this, but crypto generally just went up in that period, what were your BTC profits though?

Edit : you keep buying and sell for USDT and get your balance up in that? Nice job if so :)

Mr Kewl - January 11, 2021, 3:28 am

Yeah, that's there but then it shorts the dips too, pretty neat.

Yeah, the bot is fine but you have to be strategic and not overallocate on random things, I did 80% of it on Bitcoin a month back when it was going sideways, that time had 3 back to back losses (which happen) so lost a good amount due to leverage. While other coins gave 40-100% returns on single trades which I missed out.

My portfolio is now more balanced and I get decent returns not like I mentioned above. That was just a good run.

But the idea is to be smart and keep stop losses and diversify in coins. I have the invites available, do DM. :)
