Thread: [Question with Amazon Gift Cards](#)

medicinalmac - November 19, 2020, 8:16 am

Anyone have experience with using between 500\$-1000\$ AGC on accounts daily.

Trying to prevent any locks on the accounts.

All amazon accounts are mine with real information and extensive purchases beforehand, have 2FA and prime. I usually get these two locks:

This one doesn't actually void the AGC balance it just cancels the order and I just usually reorder a day later and it's fine. ^

I've gotten this one recently on one of my accounts and I've been trying to unlock it for a week now, no luck so far. ^

Overall just trying to find the best way to prevent my accounts from getting locked like this, if anyone has experience and wants to give me a few tips I'd really appreciate it thanks.

Not sure if I'm in the right section either.

Are these legit amazon accounts? I assume you are doing a cash out method that requires aged amazon accounts right?
