Thread: [Need help cracking .rar file password](#)

Anonymous1234 - November 19, 2020, 8:23 pm

Hi, I have a Mac and have a password-protected .rar file, but don't have the password. I've looked up everything I can, but all I can find for Mac are password crackers that might take 10 days to crack. Let me know if anyone has better suggestions or if I sent it to you if you could crack the password? Thanks.

please send it over, will give it a try.

ExodusX1 - December 31, 2020, 12:09 am

Send it to me, I'll try to crack it.

If you have windows there is good software called (Password Recovery Bundle). 2 weeks ago used it to crack RAR file.

After 4 hours the password comes up like a charm which was 4 digits number.

I can't post links coz I'm new ?

Any further assistant let me know
