Got a vouch copy and was able to log in just fine. Speedtest.net shows about a 80mbps download speed on the high end. 16gbs of DDR3 and an I7 4790k. Exactly as described in the thread.

There are multiple users on the machine at the same time so performance may vary.

I'd definitely recommend this if you have a use for it! It seems pretty stable all around.

Was Lucky enough to get a Vouch copy, Can see that the RDP is working well and the speeds are fantastic which is good.

Great person to work with, Thanks for letting me have a Vouch copy.

What about storage? SSD?

Looks amazing for \$20/month GLWS!

Vouch! Worked with Ryan before and got another server. Works like a charm, really fast and quick to be setup.

Thanks :)

EDIT: Ryan has turned out to be a scammer. Great.

?roye - November 21, 2020, 2:27 am

I've received a vouch copy last night and after playing around with it, I've found out that it's better than most RDPs here in terms of speed, connectivity, and the customer support OP provides.

I'd say it's defo worth its price and I encourage you to give it a try before getting any other RDPs.

1. sure you can get a vouch copy

2. feel free to test that out

3. in a data room in a vrack

Start a vouch contract for a 1 day trial.

xZalurex - November 21, 2020, 11:18 am

Speed seems to be okay, OP needs to work on the security of the computer and how its setup, gained ADMIN rights within 5 mins. Will give him my services if willing to pay. Other than that, this RDP and have potential if done correctly. price is amazing! Can't beat that tho. Price is perfect.

johndeo983 - November 21, 2020, 11:55 am

bought one, excellent speed, I'm recommending

rSM- - November 21, 2020, 12:06 pm

Sorry i'm a bit late on this, but I received a vouch copy and I have to say, I absolutely love the speeds and OP was very smooth to work with, even if it was just a vouch copy. From the tests I've performed on the server, it held up wonderfully without any dips in performance and all in all is a great RDP with a great seller. Would recommend for anyone who may need a server :)

Well all good, was get RDP really fast and everything is as described.

Price is really good but there is one thing which didn't suit me, I need rdp on which I will use 80-100% of resources and as OP didn't say me that before purchase, I was running my scripts and taking 100% of power so other people was probably affected.

Got in touch with him and he offer me full refund which I was take.

So he have my vouch as he was more than fair!

If you need rdp on which you will not use 100% of all resources this is really good deal.

GLWS ;)

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

iTrade - August 27, 2021, 6:18 pm

Posting here as I received a vouch copy of this product and here is what I think.

My Vouch Copy was a: RDP 3 cores 4 gb ram
Connection is very fast and responsive as I have 3 RDPs on my computer and a few of them are very slow and have very poor response to any basic actions on the computer. Even though these are UK servers, in the USA i am enjoying this with good speeds.

Also, I want to add that I have purchased 2 different RDP/VPS from different users on HF. One of the servers I purchased for more expensive than this package, can't even open programs just spikes to full CPU usage lol. So my FREE VOUCH COPY VPS is better than some other products on HF :P (i don't snitch names)

So,

I would vouch for this product. I have been using computers for years and I am not the best hardware man out there but I would say to me these seem to be a good buy considering its price..

Molly Brazy - August 27, 2021, 11:17 pm

[OBL1V10N](#) provided me with a vouch copy. I will test the server for a few days now and edit this post with my review afterwards. Thanks for the vouch copy, looking forward to having some fun with the server, as the specs are pretty neat.

Tested the server now: Speeds are okay. You should keep in mind though that the server you will receive does not have the specs mentioned in the thread. That's his whole server, you will get a vps on that server. He answers pretty quick, when you have any problems and installed Debian for me. Thanks a lot for the vouch copy!
