First it's spelled "hear", not "here".

Second, I'm going to go out on a limb here and say that you use tools created by someone else. That matches the definition of "skiddie".

Personally I could care less if you make them or not. If you get pleasure out of screwing up peoples computers, then to me your just one big jerk.

I said "I hack" I did not say what I hack you assume I hack computers maliciously because I released a RAT for mac, Its "Proof of Concept" yes it works It can be used locally to monitor what your kids do, or if your spouse is cheating. It can also be used maliciously but that's up to whoever uses it and thus that's out of my control. To define me as a "Big Jerk" you would have to have some form of proof that I am, and as far as I know you do not know me? If you did you would know that I "Pen Test" for the local school district.
