Thread: [\\$500-600 for core components](#)

drugs - November 29, 2020, 1:01 am

I got a RTX 3070, but my poor old i7-4790K just bottlenecks the hell out of it, so now I need to upgrade.

I already have storage, PSU, case, peripherals, monitors. I just need CPU, motherboard, and RAM. Possibly a new cooler too.

I have no issues with buying used, older-gen hardware as well.

Take a look at this, it's exactly under \$600, if you can't find a 5600X, just go with a 3800x (the total becomes exactly \$638.98) or a 3700X if you can't afford more than \$600 (it then becomes exactly \$588.98), i hope that helps :

PCPartPicker Part List: <https://pcpartpicker.com/list/FDMgt8>

CPU: AMD Ryzen 5 5600X 3.7 GHz 6-Core Processor

Motherboard: Asus TUF GAMING X570-PLUS (WI-FI) ATX AM4 Motherboard (\$189.00 @ B&H)

Memory: G.Skill Trident Z Neo 16 GB (2 x 8 GB) DDR4-3600 CL16 Memory (\$104.99 @ Newegg)

Total: \$293.99

Prices include shipping, taxes, and discounts when available
