Thread: [Help me figure out what's wrong here \(src code\)](#)

theN20 - December 1, 2020, 1:48 pm

I found this code on a forum the other day, it's supposed to be a giftcard generator and checker, but when I run it it keeps giving me an error. I can not post the code here because of the server rules, but if you PM me i will send it to you.

I would appreciate anyones help.

If you tell me what kind of error it is giving I may be able to take a look for you without charge.

Mascot - December 1, 2020, 3:21 pm

look , dont believe thot those applications , i dont think its a real app , its scam probably some app with virus

Format your PC. There's no such thing as a giftcard generator. Definitely malware.

6000% Malware theN20.

Ayyyther - December 2, 2020, 1:26 am

What? Are you fucking retarded?

theN20 - December 2, 2020, 2:52 am

It's source code for python, not a .exe file, I didn't download any programs, just the source code copy-paste

Ayyyther - December 2, 2020, 9:23 pm

Question still stands.

Why did you think this was legitimate?

It's not uncommon for open source code to contain malware, too.

You could at least share it, if you want us to check for you.
