Where can I download movies without my computer getting aids? Asking for a friend

I use Pirate Bay never had issues. Windows defender should protect you well enough.

Juoku - December 2, 2020, 12:13 pm

Pirate Bay is the best option in my opinion, if you want something simpler, get Stremio. You can choose add-ons like TPB or Torrentino and use it for movies, live tv, shows n such. Completely free

Piratebay is mostly safe though it's blocked in many places

Linux X - December 2, 2020, 12:15 pm

The piratebay for sure but in some countries download pirate movies/games and etc. is illegal. So be careful.

Piratebay as others said, use vpn with torrent, it works

Lyralei - December 2, 2020, 12:21 pm

I usually use a torrent search engine for this one, tpb is a grandpa so I can't trust'em with newer stuff.

You can always use Torrents. I think there are a lot of movies out there and you will surely find the ones you are looking for?
