int main() - December 2, 2020, 3:17 pm

Perfecthacks has been a project of mine since early 2015 and I have gone public / private with my cheats during that time, but have now decided to reopen my business and market my cheats.

I'm currently offering a cheap apex legends cheat for \$10 / Month (Perfect external aimbot & esp)

I was given a vouch copy for this.

Very simple to use, you download the loader; enter your serial number, run OBS64.exe as admin, type 3 things in the command prompt that pops open which adjusts your fov and smoothing for you and then start the game and put your game in fullscreen windowed mode.

No disabling anything, just a few steps and you're stomping pleb gamers. Aimbot is strong but can be subtle, the recommended settings are good enough the average player won't recognize you're cheating but if you increase the smooth, it'd be even more legit looking. ESP is very pretty, my only gripe with it is there's no different color for visible players so you kinda have to guess if they're behind the wall or not as the only real indication is if you can see their player model opposed to seeing a slightly red player model (which isn't easy on the eyes for a slightly colorblind person like me.) I've talked to int main() and he said it was a good idea.

The only bug I encountered was aimbot working on knockdown shield which I made him aware of and will be fixed as soon as he has time.

For the price of this and the quality of the cheat, you can't go wrong. I've not gotten banned yet but it also hasn't been enough time to even get banned so I'll update with an edit after today on whether or not I've gotten banned.

PingersAndMash - December 7, 2020, 2:19 am

Using the cheat works good

watthefux - December 7, 2020, 11:18 am

Really great product for the price, it's very basic, so don't expect the world for \$10.

Play around with your own settings because the recommended ones are very blatant.

lxgvn - December 9, 2020, 6:49 am

Any vouch copies left? Would love to get my hands on this Apex hack. Thanks!

Yes contact me on discord through the thread on the forum

lxgvn - December 9, 2020, 8:32 am

Alright, that works for me thanks!

lxgvn - December 14, 2020, 8:24 am

I was given a vouch copy for this,

Honestly, I'm a pretty experienced hacker in many games I play legit most of the time and I can say this hack is great. Very simple to use and understand for most people and the discord has good information if you are stuck.

The owner is very friendly and helpful when it comes to the hack and helped my every need when it wasn't working. Overall friendly discord server and good communication and support within the cheat.

For the price it's great it has a good wallhack where you can change the distance and pretty good aimbot its a great cheap hack for anyone looking to hack in apex. ?

The only error I've found is it crashing which happened a lot the first day but the owner came back the next day and fixed it all up showing he cares about the hack is great.

Overall I highly recommend this cheat due to everything I have previously mentioned I've been using it and it's been working great! ?

ChumChum - December 15, 2020, 12:17 pm

Big vouch for Int, he brings quality in everything he creates. Been using the Apex cheat for a long time. Always updated and never detected. I am never called out, customizable settings are good to go. ?
