Thread: [nvidia 3000 series and AMD 5000 series cpu never in stock](#)

CyberError - December 3, 2020, 8:07 am

what the hell guys, am trying to buy 5950x from last few weeks and its not in stock anywhere , what the hell, same happened with nvidia 3000 series gpu, fortunately i got my hand on 3070 i paid extra for it, is this because of china or these companies are very poor in stock management?

webdev77 - December 3, 2020, 4:09 pm

There are millions of people sitting around at home not doing anything. Demand is basically triple what it was a year or two ago. It's not physically possible to triple supply chain capacities within a few months when half the suppliers are hardly even working.

I'd just wait. If your computer does what you need it to do, don't worry about the new hardware. Just sit back and relax. Wait for it to come back in stock and this BS to be over with.

WuTangClan - December 5, 2020, 5:03 am

Ryzen CPUs are available in the EU, but they are coming slowly in stock.

shreder - December 6, 2020, 4:34 pm

CPU's should be instock sooner than the GPU's as GPU's are even more so sought after.

This ^

To expand, AMD makes a lot more per wafer of Ryzen processors than their GPUs.
On top of this, NVIDIA currently has poor wafer supply from Samsung for their GPUs.

Idk am not getting 5950x and am checking twice a day online, probably have to hit offline market

Xen - December 7, 2020, 8:26 am

I managed to pull a 3090 FE on Thursday and it's currently in my PC. They come in and out of stock

slowly but surely.

The Ryzen 5000 series though.. that's been difficult. I've seen some motherboard bundles with them but unfortunately, usually they have the lower end of the motherboard included.

Malevolent - *December 7, 2020, 5:58 pm*

I've got a 5950X with a new MSI x570 ACE.

They arrived today along with my 3090 TUF.

The rest of my parts SUPPOSEDLY arrive tomorrow and Wednesday.

Just in time for Cyberpunk.

NZN - *December 8, 2020, 1:28 am*

Same here, damn scalpers Ill never get my 3080..
