Hey guys!

This is probably not much to brag about, but I figured I'd use this extra time during the pandemic to learn something new. I always thought it would be cool to learn how to produce some music so here's what came out of it:

The song is called Fireflies - L / T and it's a deep house track.

Like I stated earlier, not really much to brag about, but I think it's kinda cool to have a track on Spotify ?

Let me know how much you hate it or if you like it ?

Wow, that's so cool mate.

How did you produce the track?

Thanks a lot dude!! ??

At first I started with FL but moved over to Ableton. Got the vocals from Splice and then mostly used YouTube honestly to learn.

Man, that's awesome, learning by yourself and then spotify. Congratulations. :)

For a beginner, it sounds pretty impressive.
