[=>> START NOW AND GET YOUR FIRST PACK IN 10 MINUTES <<=](#)

-
FAQ:

Do i need to invest?

There are multiple methods in this pack, making an investment will yield better results, however it is by no means essential.

Are these methods blackhat?

No! These methods are 100% whitehat.

Where do these methods work?

These methods works worldwide.

How long does it take to create my first pack?

Barely 10 minutes after reading the methods.

Could this method become saturated?

No, the methods used have several different sources for each pack created. I have personally been doing this method since August 2019 with no issues.

What if I can't even get one pack?

I assure that with these methods you'll be able to create a LOT of packs. Thus, if you purchased the premium package I will refund you if haven't got a pack in one week.

What is this about

First of all, let me start of by saying that this is my fully unbiased review. I am in no way shape or form acquainted with the seller, nor do I know him personally. Therefore, this review, is completely

honest and true. Having said that, this particular guide consists of 9 pages. Throughout this guide you're going to learn what Whait guarantees you're going to. How to create your own, potentially, unsaturated pack. However, let me make a quick distinction here. In order for you to create your own unsaturated pack that includes verifications as well, you'll have to invest money into it. While you can, indeed, create your own pack easily free of cost, you'll need to invest in order to create your own unsaturated pack that includes verifications.

Vocabulary & presentation : 9 / 10

Right off the bat, let me start off by saying that, Whait's presentation and vocabulary, is exceptional. It's easy to read, not overbearing at all, walks you through step by step on what exactly you should do to obtain your pack. It's not flooded with a ton of useless information like you would expect it to be. It's straight to the point and accurate as well.

Value for money correlation : 9 / 10

I, myself, happen to already know most of the ways presented here. Therefore this guide wouldn't be useful to me as I don't fall under the beginner/ intermediate category of e-whorer. However, please, take into consideration that I've been in the game consistently for more than 3 years now in order to obtain these information. Therefore, if you're here, this is probably something you're unfamiliar with, so the information you're provided with are going to be a lot more valuable to you than they are to me.

Paying 15\$/25\$ in order to learn how to create your own pack and break free of any future needs to buy packs is totally worth it, a no-brainer, in other words. Moreover, I had always been a fan of the mindset "Don't gift them a fish. Teach them how to fish".

Seller's responsiveness : 9 / 10

As soon as I noticed a flaw I was quick to let Whait know about it, which he replied to me in a professional manner and also made sure to update his policy and guide's terms and services. He has been both responsive and friendly as well. Therefore, from my take, support is provided wholesomely, for starters at least.

Overall : 9 / 10

All in all, this is a great buy if you fall under the beginner/intermediate category of ewhorer. You are going to receive what you paid for in the first place and Whait seems responsive and supportive so far. If you are in need of these type of information, I would encourage you to actually buy the guide instead of asking him for a vouch copy. If you find yourself struggling with these type of information and someone provided you with your solution for pennies, it would be foolish of you to try to extort him for his information instead of trying to actually help each other.

(Dec 4, 2020 11:58 AM)Harley Quinn Wrote: [\[CITE\]](#) Firstly thank-you dude for the vouch!

I have seen a tonne of guides in the past but this one definitely stood out to me. It is incredibly informational, and i don't see an opportunity for failure here. If you follow the guide, it really is a well guided process to building up packs. Definitely positive results for people who follow the instructions and use the tools that are described. There are multiple methods involved, some free and some paid. Depending on how much money you want to make will depend on your choice i guess.

Overall a high quality result focused guide, definitely recommended to people wanting to make some extra money, doing so when using these methods will guarantee results. Also the option for support if you get stuck is there but i cant see people needing the help.

Big vouch for Whait and his methods!

This guide contains 9 pages and 2 different methods are included. Well written and easy to follow instructions from start to finish in the guides.

Free tools, software links are included in the guide, suitable for beginner to expert in ewhoring, great ewhore guides, methods on creating, making your own ewhore packs.

(Dec 4, 2020 09:16 AM)itcorp Wrote: [\[CITE\]](#) The book contains unique ways to create a personal package, but that's not all, it even provides additional software tools that will save you time when collecting your material which is really great. I would also add that the book is written in such a way that users with no previous experience in this business will know what and how to do things to achieve their goals.

I have to say I'm surprised buddy, thanks for the vouch copy and I wish you a successful sale.

Well, don't trust vouch copies, just the opinions of the people who bought it: It won't do you any good if you've been in ewhoring for more than 5 days, really. If you've read at least one free tutorial, you know more about making packs than you will learn from the Whatit tutorial. He's even lazy enough to describe the snapchat scraping method but doesn't add a tool to do it even though there are tons of them on github. If you want to make your own package, this guide will not help you. Sorry Whatit, I'm just always honest and this time I drowned \$15

Hey,

Due to your review and the conversation we had in PM, I would like to add some elements.

Of course from free tutorials you'll get some free links to over-saturated packs. But still free I guess.

With this package, you can make as much packs as you want.

I'd be honored if you send me a link to a free tutorial with all the methods that my package contains. I'd be happy to see that.

You're talking about the snapchat third-apps that's will get your account banned ? Yeah obviously I didn't put that onto my packages, that'd be dumb.

Anyway, thanks for the review and your honesty that you wrote.
