Anyone recommend a pubg hack? I heard of proofcore, but not many recommendations around.

Now gamers use custom config and active.sav file to play like PRO on pubg mobile.

I use magnum x , sinki and venom .. magnum and sinki are the best .

I used hack for 6 months and I will tell you any hack give you ban after 1 day or after 5 month Sooner or later you get a ban???

If you need play with hack you should play with a guest account to be a safe.

Proofcore is a scam they rat you and sell your id for identity theft and their cheats are ass, probably why anyone can get in there no real slot system. Worst moment of my cheating life using them (still having grief (blackmail threats) from the people that they sold my id to). All I can do is post this to warn others but honestly fuck those scum.
