Hearing this song bring back old gaming memories. Video is nicely synced. Good job.

It's not good. Introduction is uneasy and incredibly choppy. The clips don't transition or flow well -- I don't feel the sync at all, which was seemingly the entire point of this video. The clips are also mediocre and uninspiring.

I'm not trying to be an ass, but I'm surprised this took 18 hours. I feel like an experienced editor could glue something together in an hour that'd be far better than what you have here.

Try harder if you care about getting places. Everyone else above me who said this is good is just lying to you (or they can't recognize what good is) and setting you up for artistic failure.

Giving your opinion is great, but neglecting other people's opinions is pretty shitty.

The other posters' opinions were essentially single sentences saying "nice shit man". They didn't point out why they found it nice or what specific parts they liked, what parts could be worked on, etc., and most of them are probably just post farming and scared to be honest. As such, their opinions can (and should) be disregarded, imho.
