Thread: [What is the best Linux system programming with C course or books ?](#)

IdeationHacked - December 7, 2020, 7:19 am

Hello guys, I want to learn Linux system programming by using C programming language. I've some basic skills in C. So I was wondering if you can help me to find some best books or online courses for that.

Thanks?,

You could start with Beginning Linux Programming and Professional Linux Programming by Wiley
Then you could try Professional Linux Kernel Architecture by Wiley

NZT - December 8, 2020, 1:02 am

I'd start with YouTube or reading through documentation at first, then try picking a highly rated Udemy (warez disallowed) course that teaches specific advanced topics you're interested in such as OS specific stuff
