What you guys think of the New season 4 attack on titan

If you guys had Crunchyroll you guys would know that the website was down on Sunday for a bit because of that show

Honestly was really amazing straight to battle really looking forward going to be one of the best anime in my opinion. A lot of hate on the opening and the Cgi . The opening was ok ? the Cgi for me didn't really bother me at all I enjoyed the whole episode

But I would like to hear your opinions/thoughts

Haven't watched it yet, actually haven't watched AoT since S1, but I'm about to start on a long ride, I hope it's worth it.

Just watched the first episode of Season 4 and I think it was okay. I missed the regular characters a lot though.

I kind of hate this new cgi thing (feels like i'm watching with 10 fps) but apart from all that I'm loving it.
