Thread: [Convo Timestamp](#)

Kill Joy - December 9, 2020, 3:49 pm

Conversations currently do not have timestamps on messages, only when they were last sent/received. Adding them would be a helpful addition as this makes it easier to find specific messages on specific dates.

Example: When sending or receiving links to cryptocurrency transactions via convo with the same member(s) multiple times over an extended period, it does become confusing when trying to find certain transactions and when they occurred.

Xerotic - December 9, 2020, 3:50 pm

Hover or tap any convo message bubble to see the time it was sent.

Apparently I fat finger every message.

I amend my suggestion to move the timestamp to above each message instead of it being a clickable bubble. Makes it more mobile friendly.
