There's so many free AHK scripts that do the exact same. Why's yours any different?

LevelTurbo - December 11, 2020, 7:01 am

@L0RE

It's not AHK. Only written in python. My own codes.

AHK scripts Battleye detected.

The Negev is already a laser beam, isn't it?

There are different options in the software. You can choose according to the way you play.

Some options are slowing the weapon down. So you can shoot like no spread+no recoil if you want.

All weapons compatible.
