Thread: [Wanna be a hacker? I give you a REAL VULNERABLE website to hack! - CHEAP](#)

xxx_player_xxx - December 11, 2020, 5:16 am

Tired of scanning and learning, and never find cool vulnerabilities?
Frustrated that tools don't work and you end up infected and no results?!

Your fight is over, meet:
"the vulns market"

An online cyber shop for vulnerabilities, ready to be exploited, reported or simply explored by you!

How this works:

First, you contact me.

Second, you tell me what you are interested in. It can be a SQLi or XSS, you may want a specific country or a specific domain extension (com, gov, edu etc).

Third, I selected the vuln that is the most appropriate to you.

Forth, you pay.

Fifth, you get your vulnerability, ready to be used.

NO SCANNING, NO SCAMMING, NO BULLSHIT!

Get your vulnerability today, first 3 clients get a 5\$ pack (1 SQLi + 1 XSS) to be selected by your preferences.

I don't get your point but .. w/e

see, instead of saying that, what you could do is trying my service, then review it and be happy and satisfied.. my 2 cents..
