It's a panel using [Adgate Media](#) offers wall API to earn giftcards(which you will be refilling from the dashboard)

Written in php using a free template source I am the only author of the platform and I am selling it because I have no interest in bringing forward the project

No frameworks involved, I've pentested during development the whole platform including offer notifications

Price: \$150 btc

Includes setup and long-term technical support

My discord is Coiner#1036 if you want to discuss or purchase the project add me there

I was always wondering if this kind of site is profitable.

How much did you make with this project?

Please pm me the details.

The platform has never been used, it was developed and completed while looking for an investor then abandoned

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
